6TH INTERNATIONAL
LIVE ENDOSCOPY COURSE

Milan 2015, June 18-20

www.imageliveendoscopy.com
We are very pleased to warmly welcome in Milan the Italian and International Colleagues who will be attending the 6th International Live Endoscopy Course - IMAGE 2015.

This year, as per tradition, we have an outstanding international faculty coming from all over the world. They will share with us knowledge and innovations through a combination of lectures, live cases, and discussions that will cover most of the hot topics in gastroenterology and digestive endoscopy.

For the first year gastroenterologists will meet pulmonologists during the lecture dedicated to EBUS and live cases will demonstrated how to approach the mediastinal ultrasonographic study.

As in the last edition, some of the major experts in IBD will join the meeting adding new expertise in the field of endoscopy of patients with IBD and updating us on the advances in IBD surgery.

A number of cutting-edge technologies, integrating minimally invasive surgery, flexible endoscopy and advanced techniques such as stenting for GI tract and biliary drainage will be presented and demonstrated during live cases.

Lectures will be dedicated to enteroscopy, bowel preparation, new oral anticoagulants, Barrett’s esophagus and other interesting issues.

As innovation for the 6th edition we created a dedicated App “My IMAGE” to share and make available a range of services and tools that will improve the fruition of the meeting.

Wishing everyone a fruitful and enjoyable time.

Milan is one of the most modern and avant-garde Italian city. Thanks to its important museums, theatres and landmarks it attracts more than two million annual visitors. Among the places to see: the Duomo Cathedral, the Last Supper by Leonardo da Vinci, the Castello Sforzesco and the Brera Art Gallery. Milan is also a city to walk: unmissable the contrast between the historical Galleria Vittorio Emanuele and the brand new Gae Aulenti Square.
